Filing Date Herewith  
Title PROCESS FOR PREPARATION OF FORMATE ESTERS OR  
METHANOL AND CATALYST THEREFOR

PRELIMINARY AMENDMENT

Please amend the above-identified application as follows:

In the title:

--(Amended) PROCESS FOR PREPARATION OF FORMATE ESTERS OR  
METHANOL AND CATALYST THEREFOR --

In the claims:

Please cancel claims 1-4 and 6-10 without prejudice.

Please add the following new claims:

12. (New) A process for producing a formic ester, comprising reacting carbon monoxide with an alcohol to produce a formic ester, wherein the reaction is performed in the presence of an alkali metal-type catalyst other than an alkali metal alkoxide, and/or an alkaline earth metal-type catalyst.
13. (New) A process for producing a methanol, comprising reacting carbon monoxide with an alcohol in the presence of an alkali metal-type catalyst other than an alkali metal alkoxide, and/or an alkaline earth metal-type catalyst to produce a formic ester, wherein a hydrogenolysis catalyst for formic ester and hydrogen are allowed to be present together in the reaction system to hydrogenate the produced formic ester and thereby obtain a methanol.
14. (New) A process for producing a methanol, comprising reacting carbon monoxide with an alcohol in the presence of an alkali metal-type catalyst other than an alkali metal alkoxide, and/or an alkaline earth metal-type catalyst to produce a formic ester, separating the produced formic ester and hydrogenating the separated formic ester by allowing a hydrogenolysis catalyst and hydrogen to be present together, thereby obtaining a methanol.
15. (New) A process for producing a methanol, comprising reacting an alcohol in the presence of an alkali metal-type catalyst other than an alkali metal alkoxide, and/or an alkaline earth metal-type catalyst, and a catalyst containing Cu simultaneously with Mn and/or Re to obtain a methanol from carbon monoxide and hydrogen.
16. (New) The production process as claimed in claim 1, wherein the alkali metal-type catalyst other than an alkali metal alkoxide and the alkaline earth metal-type catalyst are a catalyst containing an alkali metal salt and a catalyst containing an alkaline earth metal salt, respectively.

EL 243099008 US

17. (New) The production process as claimed in claim 2, wherein the alkali metal-type catalyst other than an alkali metal alkoxide and the alkaline earth metal-type catalyst are a catalyst containing an alkali metal salt and a catalyst containing an alkaline earth metal salt, respectively.
18. (New) The production process as claimed in claim 3, wherein the alkali metal-type catalyst other than an alkali metal alkoxide and the alkaline earth metal-type catalyst are a catalyst containing an alkali metal salt and a catalyst containing an alkaline earth metal salt, respectively.
19. (New) The production process as claimed in claim 4, wherein the alkali metal-type catalyst other than an alkali metal alkoxide and the alkaline earth metal-type catalyst are a catalyst containing an alkali metal salt and a catalyst containing an alkaline earth metal salt, respectively.
20. (New) The process for producing a methanol as claimed in claim 2, wherein the hydrogenolysis catalyst is a solid catalyst and the alkali metal-type catalyst other than an alkali metal alkoxide and/or the alkaline earth metal-type catalyst is supported on said solid catalyst and used for the reaction.
21. (New) The process for producing a methanol as claimed in claim 3, wherein the hydrogenolysis catalyst is a solid catalyst and the alkali metal-type catalyst other than an alkali metal alkoxide and/or the alkaline earth metal-type catalyst is supported on said solid catalyst and used for the reaction.
22. (New) The production process as claimed in claim 1, wherein the alcohol is a primary alcohol.
23. (New) The production process as claimed in claim 2, wherein the alcohol is a primary alcohol.
24. (New) The production process as claimed in claim 3, wherein the alcohol is a primary alcohol.
25. (New) The production process as claimed in claim 4, wherein the alcohol is a primary alcohol.
26. (New) The production process as claimed in claim 5, wherein the alcohol is a primary alcohol.
27. (New) A catalyst for producing a methanol, which is obtained by loading an alkali metal-type catalyst other than an alkali metal alkoxide, and/or an alkaline earth metal-type catalyst on a solid hydrogenolysis catalyst for formic ester.
28. (New) A catalyst for producing a methanol, which is composed of an alkali metal-type catalyst other than an alkali metal alkoxide, and/or an alkaline earth metal-type catalyst, and a catalyst containing Cu simultaneously with Mn and/or Re.

R E M A R K S

This Preliminary Amendment is being submitted to eliminate multiple dependent claims.

It is respectfully submitted that the subject matter of the present application is new, non-obvious, and useful. Prompt consideration and allowance of the application are respectfully requested.

Attached hereto is a marked-up version of the changes made to the title by the current amendment. The attached page is captioned "Versions with markings to show changes made."

Respectfully submitted,

Dated: *October 25, 2001*
